**WORLD
PREMIERE**

MODUL·XL

Digital Printing & Displays
by www.pixis.be

Modular display solutions for
outdoor signs, exhibitions, events, etc.

Unfold your potential

A truss system like this has never been seen before! Not only is it foldable, - it's made in composite, - and even in a nice design!

There is more! Not only has the narrow simplicity of nature's own strongest engineering been used in the strongest way something light can possibly be made. - It is the combination of all above that sets a whole new standard in all the markets it is going to influence...

We are proud to introduce a world premiere; the product called **MODUL-XL**- 20 x 20 cm profiles, able to be transported entirely flat, - with a free span of up to 10 meters possible! In other words: *This is exactly what you need when size really matters...*

MODUL-XL

size matters indoor & outdoor

Patented

No tools needed

- FOLDABLE SYSTEM
- RE-USEABLE
- OUTDOOR USE
- REQUIRES NO TOOLS
